# *Buyers Guide*

## How to buy CO-NFT Shares on OpenSea

### SETUP WALLET

#### 1 Download MetaMask

Download to your desktop browser at <http://metamask.io/>

Once your MetaMask is set up, you are ready to add cryptocurrency funds.

#### 2 Add the Polygon Network

- Open Metamask
- Click on your user icon/avatar on the top right
- Click "Settings"
- Click "Networks"
- Click "Add Network" at the bottom

#### 3 Enter the Polygon Network Details

- Network Name: Polygon
- New RPC URL: <https://polygon-rpc.com/>
- Chain ID: 137
- Currency Symbol: MATIC
- Block Explorer URL: <https://polygonscan.com/>

Now you're ready to operate on the Polygon network with your MetaMask wallet.

**Note:** As we mint our CO-NFT Shares on Polygon, OpenSea only accepts WETH for purchasing.

## FUND

There are several ways to purchase Matic. We recommend Crypto.com

<https://crypto.com/>

### 1 Install Crypto.com App

Next we need to fund your wallet by sending cryptocurrency from an exchange such as <https://crypto.com/> (iOS/Android)

### 2 Buy MATIC

As we can not directly buy Wrapped ETH (required for OpenSea) we need to first buy MATIC.

1 click trade

2 search for 'MATIC'

3 click 'BUY MATIC'

4 Add Credit / Debit card

### 3 Transfer MATIC to your MetaMask

After you've completed your MATIC purchase, you can now transfer to your MetaMask wallet.

#### 1 click "Transfer"

#### 2 choose "External Wallet"

#### 3 Add Wallet Address \*

\* Your MetaMask wallet address is located directly beneath your account name in the wallet.

#### 4 Swap MATIC to WETH

There are numerous methods for swapping your MATIC to WETH, but we recommend Plasma finance, as it's the consistently cheapest/fastest route.

[This Link](#) will automatically open the Exchange with the right Trading pair (MATIC/WETH) for you.

##### 1 click 'Swap/Tauschen'

The screenshot shows the HyperDEX interface for a swap. It has two main sections: 'Verkaufen' (Sell) and 'Kauf (geschätzt)' (Buy (estimated)). In the 'Verkaufen' section, a swap from 1 MATIC to approximately 0.000588766 ETH is selected. The 'Kauf (geschätzt)' section shows the estimated amount of ETH received. A large 'Tauschen' (Swap) button is at the bottom.

##### 2 confirm swap

The screenshot shows the 'Swap bestätigen' (Confirm Swap) interface. It displays the swap details: 1 MATIC to 0.000588766 ETH. It includes a note: 'Die Ausgabe wird geschätzt. Sie erhalten mindestens 0.000585 ETH oder die Transaktion wird rückgängig gemacht.' (The output is estimated. You will receive at least 0.000585 ETH or the transaction will be reversed.) Below this, it shows the network as 'Netz' (Network) and the provider as 'JetSwap'. A 'Swap bestätigen' (Confirm Swap) button is at the bottom.

##### 3 Sign with Metamask

The screenshot shows the Metamask sign interface. It has tabs for 'DETAILS', 'DATA', and 'HEX'. The 'DETAILS' tab is selected, showing the transaction details: 'Estimated gas fee' (0.028875 MATIC), 'Gesamt' (Total) (1.028875 MATIC), and a note: 'Amount + gas fee' (0.000585 ETH). It also shows the 'Max amount' (1.028875 MATIC). At the bottom are 'Ablehnen' (Decline) and 'Bestätigen' (Confirm) buttons.

Once your MetaMask is connected on the Polygon network, make sure you see MATIC above, and WETH below inside the Plasma interface, in the lower right of the page.

Calculate a sufficient amount of WETH needed for your CO-NFT purchases, and execute the swap. Within moments your MetaMask will be funded with Wrapped Ether on Polygon, ready for transactions on Metawalls + OpenSea.

**Note:** In case your Metamask is not showing the Wrapped ETH simply add the Token in Metamask (import Token) and enter the contract address: 0x7ceb23fd6bc0add59e62ac25578270cff1b9f619

##### 1 add custom token

The screenshot shows the 'Import Tokens' interface in Metamask. It has a 'Custom-Token' section. A note says: 'Anyone can create a token, including creating fake versions of existing tokens. Learn more about [scams and security risks](#).' It has fields for 'Token-Vertragsadresse' (Contract Address), 'Tokensymbol' (Token Symbol), and 'Dezimalangabe der Präzision' (Decimal precision). At the bottom is a 'Add Custom Token' button.

## PURCHASE

### METAWALLS

#### 1 Go to Metawalls

CO-NFT sale page: <https://metawalls.io/sales> and select your favorite CO-NFT

#### 2 Choose your Share

Choose from the visible 'share' by clicking inside the Grid. A Pop up Window will appear showing the NFT.

#### 3 Click 'Buy'

This action will direct you to the NFT on Opensea.

### OPENSEA

#### 1 Click 'Buy now' to start transaction

#### 2 Review transaction details

#### 3 Check 'Terms of Service' and click 'Checkout'

\* After confirming the transaction you will receive a confirmation message, and the CO-NFT will appear in your Opensea account under Profile/collected.

Congratulations! You are now a bonafide member of the Metawalls community, supporting artists and creatives from across Berlin!

We hope this is the start of many NFT art adventures for you...

If you have any issues at all with any of the above, please reach out to the METAWALLS team via Discord: <https://discord.gg/e8c4zE9v> or you can email us at: [support@metawalls.io](mailto:support@metawalls.io)
